

Cyber-Security-Check: (CSC)

# How secure is your business? Verify and perform a check now

Outages, data loss and critical business interruptions due to security breaches are becoming increasingly common in the digital world. Check & optimize your security posture with us before incidents occur. **Independent, efficient and sustainable.**

- ✓ Objective audit of your security posture based on ACS
- ✓ Audit based on BSI, ISACA and ISO/IEC 270001 standards
- ✓ Risk assessment, report & recommendations for action

## We assess the current level of your cyber security:

### Qualified testing & analysis

- Assessment by certified Cyber-Security-Practitioner
- No time-consuming preparation as in an audit
- Interviews & inventory by certified auditors

### Risk assessment & evaluation

- Risk assessment and cyber security assessment
- Identification of security deficiencies
- Report & recommendations for action

### Optimize protection level & awareness

- Kick-off and discuss results with relevant teams
- Establish security awareness within the company
- Take action based on the recommendations
